Fixture positions follow the venue’s published lighting plot; the currently installed rig is not verified.

Original printed model names are retained; approximate catalogue housings are displayed where available. Installed identities, native modes and the DMX patch remain unverified.

Fixture heights are approximate; trim heights may differ from the drawing.

156 individually drawn performance-lighting housings from lighting ground-plan sheet02. This partial view excludes architectural house/run/sail lights and source-omitted curtain warmers,HVAC uplights and arch LED tape. Source date,current setup and total installed census are unknown.

Proper catalogue models and labelled mechanical substitutes are retained. Blue-engine LED family/generation/optic and conventional-profile optics remain unresolved. Five source2m ColorSource bars use1.8m mechanical substitutes pending exact body/mode correction. All cells are counted within whole housings.

Published trim labels are retained where supplied. Other heights,ladder tiers/arms,room/stage datum,focus and the explicitly displaced spot-platform detail are estimated. This visual subset is unpatched and all output is excluded.
