GENERAL NOTES

1. Source-based lighting plan. Confirm the current rig with the venue.
2. PARTIAL: included fixtures are not a full physical-unit census.
3. DMX PATCH WITHHELD: provisional or unchecked addresses are not published.
4. Approximate planning view; not official venue paperwork or output-ready. Original HitLight symbols only; no source pages, OEM meshes, photos or logos. Original files remain private; modes and patch unverified.

VENUE & DRAWING SOURCES

Chateau Neuf

Betong basement main stage · Published room reference; current setup unconfirmed

Slemdalsveien 15, 0369, Oslo, NO

https://studentersamfundet.no/

Sources checked 2026-10-21

Generated by HitLight from the reviewed partial Chateau Neuf reconstruction. Venue sources are cited as facts; their original artwork remains private.

Symbols: HitLight-owned category artwork. No manufacturer model geometry or original source pages included.

Source-based reconstruction. Confirm the current installation and equipment availability with the venue.

Scale, fixture positions, mounting heights and aiming may include estimates; this is not a rigging specification.

Provisional fixture matches are labelled as placeholders. The recorded subset is not a complete physical inventory.

DMX addresses are withheld from public plans until their exact source patch is reconciled.

Existing original approximate xenon housing replaces the prior missing public body. Native mode/channel/range/default tables and control policies are unchanged; only the physical-profile hash binding advances. Front aperture, detail, optics and derived hanging clearance are planning estimates, not hardware or photometric acceptance.

29 source records display 29 approximate public catalogue housings or labelled donors and 0 visual fallbacks. 6 B-EYE K10 bodies updated. Fixture records and layouts stay fixed. Native tables match; inferred transverse tilt axis/full2D aim metadata, body and derived height change as reviewed. Source currency, modes, patch, optics and trim remain unverified.

Original approximate19-lens B-EYE K10 body. Exact native mode/channel/range/default tables retained. The transverse tilt axis changes Z to X with inferred confidence, producing inferred full2D aim; both native modes and combined pan/tilt poses reviewed. Body/pivots/apertures and derived hang height remain planning estimates. Source identity, installed mode/patch, optical detail and hardware calibration are not newly verified.

10 Bright XLED references use the existing original 12-lens public body edition. Only profile IDs change; all pre-existing native modes and controls, printed source labels, stable fixture IDs, existing enabled/patch state and stored placements/mounts are retained. Installed modes, source currency, body detail and geometry remain unverified.

Approximate planning view; not official venue paperwork or output-ready. Original HitLight symbols only; no source pages, OEM meshes, photos or logos. Original files remain private; modes and patch unverified.
