Symbols: HitLight-owned category artwork. No manufacturer model geometry or original source pages included.

Partial reconstruction from the venue’s lighting documentation; the currently installed rig and its complete fixture census are not verified.

ESTIMATED GEOMETRY: the documents give no complete scale or trim heights, so the stage size, fixture positions in metres and hanging heights are best-guess estimates, not measurements.

25 source-labelled fixture records retain unconfirmed exact catalogue identities or modes; their printed source names and labelled display substitutions remain unchanged.

Modes and DMX addresses are unverified best guesses; check them with the venue before driving real fixtures.

55 source-based records in this scenario display 54 approximate public catalogue housings and 1 labelled visual fallbacks. 16 existing display references now use their available approved bodies. Source identities, labelled donors, modes, patch and output exclusions remain unchanged; current installation and optics are unverified.

Partial planning view; modes and patch unverified; output excluded.
