Original HitLight planning drawing; source artwork stays private.

Symbols: HitLight-owned category artwork. No manufacturer model geometry or original source pages included.

Fixture positions follow the venue’s published lighting plot; the currently installed rig is not verified.

Fixture heights are approximate; trim heights may differ from the drawing.

236 individually drawn housings from a July2017 repertory plot. Eight ColorSource25–50 positions implied by its legend and one inventory-only scoop are not invented. The current setup and installed census are unknown.

The saved view contains 236 fixture records: 234 public catalogue body references, including ten newly authored approximate Source Four PAR EA-family housings, and two neutral Lycian 1275 followspot markers whose installed variant and approved matching body remain unresolved.

Source RGBA modes, catalogue maker metadata and narrow/zoom optics require reconciliation. This partial historical source subset is not a current installed inventory.

All heights and mounting arrangements are estimated. Detached side ladders,box booms,balcony and beam details are registered approximately; beam throw labels are slant distances. The source marks downstage layout not to scale. All output excluded.

Partial source-based planning reconstruction; the current installation and complete fixture census are unverified.

Source-matched catalogue bodies are shown where available. Unresolved source identities remain labelled visual markers. Installed modes and DMX patch require verification; visual-only fixtures remain excluded from output.

Two source-labelled Color Kinetics ColorBlaze 48 bars at Strip 2 use an original approximate 48-inch RGB family housing, replacing longer 72-inch donors. The July 2017 plot names two 48-inch units. Installed RGB revision, upgrade, firmware, mode and patch remain unknown. These two remain disabled and unpatched with no mode selected.

The ColorBlaze 48 catalogue retains all four researched 1/2/4/8-group modes with inferred byte order, transfer and software idle explicitly limited. Body details, optical layout and mount pose are estimates; no hardware or photometric verification is claimed.

Ten Source Four PAR positions use newly authored approximate PAR EA-family housings. Installed lens, lamp and connector remain unverified. The external-dimmer virtual mode does not establish an installed patch. Housing, bracket/clamp pose and optical detail are visual estimates; native controls remain unchanged. No hardware, clearance or photometric acceptance is claimed.

Estimated geometry. HitLight symbols only; source art, OEM meshes, photos and logos excluded. Originals private; not official or output-ready.
