GENERAL NOTES

1. Source-based lighting plan. Confirm the current rig with the venue.
2. PARTIAL: included fixtures are not a full physical-unit census.
3. DMX PATCH WITHHELD: provisional or unchecked addresses are not published.
4. Owner-approved source-based reconstruction. Confirm the current venue setup; all source, coverage, geometry and output qualifications above remain authoritative.

VALIDATION APPENDIX

WARNING · PATCH_WITHHELD

DMX patch facts are withheld pending source verification. This planning document cannot be used for hardware output.

Objects: — · Remediation: review the source facts and regenerate.

ERROR · STAGE_DIMENSIONS_UNCONFIRMED

Confirm the stage dimensions before producing a final technical document.

Objects: Club · Remediation: review the source facts and regenerate.

WARNING · MODE_UNVERIFIED

DMX modes are unverified; output remains excluded.

Objects: F001–F004, F006–F010, F012–F015, F017–F019, F022, F024, F026, F029–F033, F035, F036 · Remediation: review the source facts and regenerate.

WARNING · FIXTURE_DISABLED

Fixtures are disabled for this visual planning reconstruction.

Objects: F001–F004, F006–F010, F012–F015, F017–F019, F022, F024, F026, F029–F033, F035, F036 · Remediation: review the source facts and regenerate.

WARNING · TITLE_METADATA_INCOMPLETE

Some professional title-block metadata is missing; the document will show an em dash.

Objects: 6f2773fb63f1dbb89011fee5 · Remediation: review the source facts and regenerate.

Kleine Dijk 57, 8600, Diksmuide, BE

https://www.4ad.be/repetitie-en-verhuur/downloads/

Sources checked 2026-10-23

Symbols: HitLight-owned category artwork. No manufacturer model geometry or original source pages included.

Source-based reconstruction. Confirm the current installation and equipment availability with the venue.

Scale, fixture positions, mounting heights and aiming may include estimates; this is not a rigging specification.

Provisional fixture matches remain explicitly labelled as visual substitutes. The recorded subset is not a complete physical inventory.

DMX addresses are withheld from public plans until their exact source patch is reconciled.

Catalogue identities corrected in place; installed modes, patch, geometry and source currency remain unverified.

All 36 saved fixture records have public catalogue bodies; no neutral body markers remain. This partial source subset does not establish the complete physical inventory.

Four Jet Spot4Z bodies are original visual approximations. Existing source modes and patch status are unchanged. The library source zoom range differs from current manufacturer documentation. Body details, dimensions, optics and mounting remain estimates; no hardware testing or calibrated photometry is implied.

Catalogue bodies are shown for every saved record. Family and optical substitutions remain visibly labelled. Installed modes and DMX patch require verification; visual-only fixtures remain excluded from output.

Six StudioCOB FC records use the reviewed existing black FC family housing as an explicitly labelled visual substitute. The nominal30-degree catalogue lens is unverified; actual lens and native mode remain unknown. These six stay disabled and unpatched. The technical pack lists six in stock but labels three on its plot; all existing positions are retained without asserting six independently plotted fixtures.

Eight source-labelled Robe LEDBeam150 FWQ units use the existing simplified FW RGBW family housing. The manufacturer manual covers FW and FWQ together. Exact installed Q revision, firmware and native personality remain unverified. The model has one common aperture surface for the seven-LED source, rather than detailed individual lens geometry. These eight stay disabled and unpatched with no mode selected.

Five source-labelled ADJ Mega Bar Tri / MegarTriBar records use the existing 18-optic Mega Tri Bar housing as an inferred source-name match. Catalogue 3/54/75-channel personalities differ from the manufacturer current seven-mode description; installed generation, mode and optics remain unverified. These five stay disabled and unpatched with no mode selected. The source stock list has six units and its plot has five; no additional unit or position is invented.

Three source-labelled EVO160F units use a new original approximate common TU/DY family housing with one Fresnel aperture and manual yoke. The source does not identify the installed white variant, firmware, personality or patch. The selected daylight catalogue body is a visual family representation only; its CCT is not an installed-unit claim. These three remain disabled and unpatched with no mode selected. Manual/product specification conflicts and body/optical estimates remain unresolved.

Owner-approved source-based reconstruction. Confirm the current venue setup; all source, coverage, geometry and output qualifications above remain authoritative.
