All fixtures disabled/unpatched. Display modes do not establish installed personalities, circuits or DMX addresses; mounts/focus/currentness remain unverified.

Public 3D shows 98 approximate public catalogue housings or labelled donors and 0 category markers across 98 records. Editable copies retain labelled no-output catalogue bodies. No original drawing or manufacturer-model redistribution rights granted.

Exact available catalogue display bodies are restored through verified immutable references. Fixture identities, installed modes, patch and output verification are unchanged; original source qualifications remain authoritative.

Partial source-based planning reconstruction; the current installation and complete fixture census are unverified.

Source-matched catalogue bodies are shown where available. Unresolved source identities remain labelled visual markers. Installed modes and DMX patch require verification; visual-only fixtures remain excluded from output.

3 existing Cameo FLOOD600 display references use its repaired original public body. Fixture records, native controls, source/donor labels, existing output exclusions and patch state and stored placements/mounts are unchanged. GDS house lights, unknown floods, T/64 wide and inferred Ribalta labels remain qualified visual substitutes. Small details are estimated; installed identity, source currency and geometry remain unverified.

Approximate planning view; not official venue paperwork or output-ready. Original HitLight symbols only; no source pages, OEM meshes, photos or logos. Original files remain private; modes and patch unverified.
