GENERAL NOTES

1. Source-based lighting plan. Confirm the current rig with the venue.
2. PARTIAL: included fixtures are not a full physical-unit census.
3. DMX PATCH WITHHELD: provisional or unchecked addresses are not published.
4. Approximate planning view; not official venue paperwork or output-ready. Original HitLight symbols only; no source pages, OEM meshes, photos or logos. Original files remain private; modes and patch unverified.

VENUE & DRAWING SOURCES

Murphey Performance Hall

Murphey Performance Hall — typical reference rig · Published reference — not a verified current house rig

72 W College Ave, San Angelo, TX 76903, San Angelo, Texas, US

https://www.sanangelopac.org/tech-specs

Sources checked 2026-10-20

Generated by HitLight from the reviewed partial Murphey Performance Hall reconstruction. Venue sources are cited as facts; their original artwork remains private.

Symbols: HitLight-owned category artwork. No manufacturer model geometry or original source pages included.

Fixture positions follow the venue’s published lighting plot; the currently installed rig is not verified.

The plot gives no full scale or trim heights, so scale and heights are estimated.

Typical reference configuration from page 21 of the 2025 technical pack. The 18 stage-side-boom fixtures are optional per-show positions and are not kept set up.

138 plotted bodies are represented; an 18-body Orchestra Cloud inset is not registered to the main stage and is omitted from this view. No complete current installed census is claimed.

Geometry, focus, mounting and individual heights are estimates. All fixtures are excluded from output.

Four Source Four 14-degree fixtures now use their available exact bodies. Four LED Lustr+ fixtures retain labelled visual substitutes pending body/profile correction. The plot shows three Focus Spot 4Z units; the inventory lists one.

The four 14-degree Source Four substitutes were replaced in place with the available 14-degree catalogue bodies; patch and current-installation status remain unverified.

16 Spectra Cyc 200 bodies now have verified original-work public permission; geometry and native profiles are unchanged. Hardware revision, optics and accessories remain approximate. Existing source/donor identities, geometry, mode/patch and output exclusions remain qualified.

138 records display 138 approximate public catalogue housings or labelled donors and 0 visual fallbacks. 32 ETC D40 Lustr+ bodies now have verified original-work public permission; geometry and native profiles are unchanged. Yoke pose, clamp clearance, optical assumptions and accessory details

HitLight
