GENERAL NOTES

1. Source-based lighting plan. Confirm the current rig with the venue.
2. PARTIAL: included fixtures are not a full physical-unit census.
3. DMX PATCH WITHHELD: provisional or unchecked addresses are not published.
4. Partial planning view; modes and patch unverified; output excluded.

HitLight

VENUE & DRAWING SOURCES

Mandeville Auditorium

Main room · House rig

9500 Gilman Drive, San Diego, CA, US

https://mandeville.ucsd.edu/facilities/technical-information.html

Sources checked 2026-11-03

Original HitLight diagram; source artwork remains private.

Symbols: HitLight-owned category artwork. No manufacturer model geometry or original source pages included.

Fixture positions follow the venue’s published lighting plot; the currently installed rig is not verified.

202 source-based fixture records retain their original printed source identities. The current public view has 186 catalogue body references and 16 visual fallbacks. Installed modes and DMX patch are unverified; all original output exclusions remain.

Fixture heights are approximate; trim heights may differ from the drawing.

202 individual fixture housings from the January2018 plot, including30fixedhardwiredSource4PARhouselights. Repeated circuit numbers do not merge physical heads.

186 proper catalogue bodies or labelled family donors;16neutralScoop/FarCyc/R40housingspendingpropermodels. Fresnel makers/variants and PAR optics remain unverified.

TwoE4visibleprofiles have hidden conflicting unit5labels beneath visible4/7labels; one visible housing per point is retained. Hidden objects are not additional fixtures. The stock key differs from the drawn profile optics and PAR64counts; unlocated stock is not fabricated. Current installation is unverified.

Source scale, electrical offsets and boom heights inform placement. Working trims, boom side-arm spacing, FOH/ladder/box/house roots, focus and obstruction clearance are estimates. All fixtures are excluded from output.

202 source-based fixture records currently display 186 public catalogue housings and 16 visual fallbacks. Original source identities, modes, patch and output exclusions are unchanged.

Two source-labelled Altman six-inch 500W Fresnels retain explicit Colortran 6 housing substitutes. Existing Colortran 8-inch and SourceFourPAR references now use original public housings. Four Altman14-inch scoops, six Altman three-channel six-inch R40 strip housings and six Colortran three-cell FarCYC housings remain neutral pending proper exact bodies.

Existing Colortran 6-inch/8-inch Fresnel / Source Four PAR references now use newly authored approximate public housings. Body details, lens shape and manual bracket pose are estimates. Native controls, fixtures and layout are unchanged. Other-make and unidentified source fixtures using a labelled mechanical donor remain substitutes; this update does not identify installed models, optics or lamp ratings, or establish hardware, clearance or photometric acceptance.

Partial planning view; modes and patch unverified; output excluded.
